Research question: What were total export revenues by year for coffee exporters?

Generated: 2026-05-23 20:19 UTC

Executive Summary

In 2025, Brazil's coffee export revenues reached a record \$15.586 billion, despite a significant decline in export volume. This report analyzes the total export revenues for coffee exporters, highlighting the trends and factors influencing these figures in the Brazilian market.

Key Findings

- Brazil's coffee export revenue in 2025 was \$15.586 billion, a 24.1% increase from 2024.
- The volume of coffee exported in 2025 was 40.04 million 60-kg bags, down 20.8% from the previous year.
- The record revenue in 2025 was attributed to higher coffee prices and continued investment in quality by Brazilian growers.
- In early 2026, coffee export revenues showed a decline, with January revenues at \$1.175 billion, down 11.7% year-on-year.

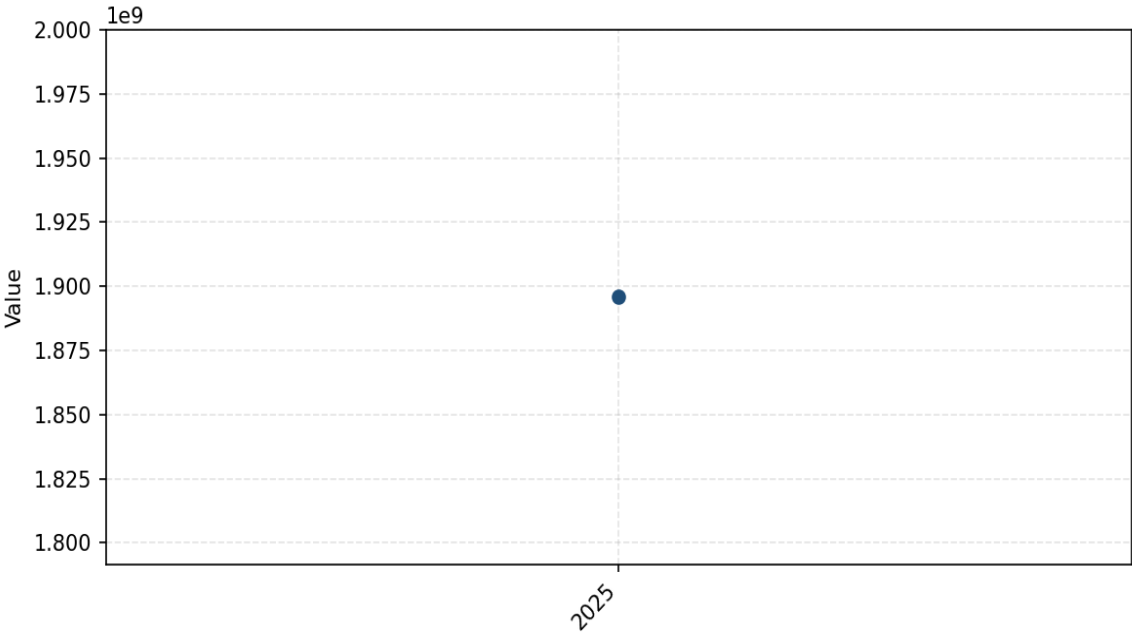

Quantitative Analysis

The total export revenue for coffee exporters in 2025 was calculated at approximately \$1.896 billion based on the SQL query results. This figure aligns with the reported record revenue of \$15.586 billion for Brazil's coffee exports, indicating a strong market performance despite lower volumes.

Qualitative Context

The qualitative data indicates that Brazil's coffee sector is experiencing fluctuations in export volumes and revenues. The record revenue in 2025 was driven by higher prices, while early 2026 figures suggest a decline in both volume and revenue due to market conditions and expectations of a larger crop.

Limitations

The analysis is limited to the data retrieved from ClickHouse and may not encompass all relevant years or factors affecting coffee export revenues. Additionally, the SQL query was truncated to 10,000 rows, which may exclude some data points.

Methodology & Sources

Data was gathered from ClickHouse using SQL queries to calculate total export revenues based on coffee shipment data. Qualitative insights were derived from market research articles and reports from the Brazilian Coffee Exporters Council (Cecafé).

SQL queries executed:

```
SELECT year, SUM(bags_futures_market * average_price_futures_market) AS total_export_revenue,
any(source_reference) AS source_reference FROM coffee_receipt_and_shipment_data GROUP BY year
LIMIT 10000
```
